### *Type of services*

The thermal waters that are born from our sources are rich in minerals, of therapeutic virtues and beneficial for the organism.

The mineral water of the Santamaria Thermal Baths is classified as "natural sulphurous bicarbonate-sulphate-alkaline saltwater and hyperthermal alkaline-mineral water" and flows at temperatures ranging between 38 ° and 48 °.

Particularly suitable for the treatment of arthoreumatic, otorhinolaryngological, respiratory, dermatological and female genital tract diseases.

The structure, in addition to the medical director of the plant, always present during the course of the therapies, avails itself of the advice of two specialist medical figures: an orthopedist, an otolaryngologist and a cardiologist.

The Thermal Structure has four branches affiliated with the National Health Service:

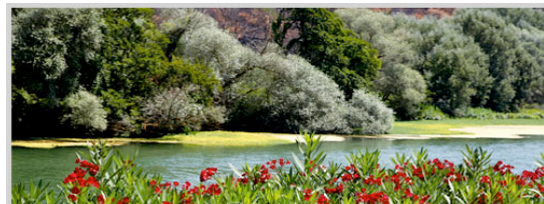

- Muds and therapeutic baths
- Sludge and annex showers
- Therapeutic baths for arthoreumatic diseases
- Inhalations and Aerosols

In support of the structure, the hotel, the bar service and the restaurant.
